

THE GLEICHEN CALL

VOLUME XXXIII NO 25

GLEICHEN, ALBERTA, WEDNESDAY SEPTEMBER 4, 1940

SUBSCRIPTION \$2.00 PER YEAR

MANY TOWNSPEOPLE SEE 22ND BATTERY LEAVE FOR EAST

Shortly after noon bus Friday almost everybody in town was at the station to see Gleichen's 22nd Battery as the 78th Battery go through en route to Camp Shilo, Manitoba. The train was a little late consequently the stop was very brief.

Almost everyone at the station had brought parcels for the boys and as none of the soldiers were able to get off the train the parcels were handed in through the windows.

It was a quiet and sad faced crowd on the platform and the soldiers also felt gloom consequently very few words were spoken in fact there was no time to say much but was gone and for the rest of the day Gleichen was a sad lonely town indeed.

We are not certain what soldiers from the surrounding district were on the train but the following from town were aboard:

Wilbey Murray, Luke Murray, Bob Taylor, E. Woods, E. Lester, John Clifford, S. Barabash, L. Thorburn, V. Jennings.

Camp Shilo, Man. Sept. 1, 1940
Edgar Call:

Would you mind through the medium of The Call to express our thanks to the people of Gleichen for their many parcels and gifts which made our trip all the more enjoyable. At the same time, we would like to express thanks to yourself for making it possible to receive The Call.

Below are a few notes concerning the Gleichen boys called Notes From Shilo:

It was with regret that Bdr. Kilcup had to be left in Calgary, due to a bad knee which will require an operation.

The 22nd and 78th boys are still wondering who the girl was who gave Bdr. Murray such a notable farewell at the Calgary depot?

Many former Gleichen people gave the boys a grand sendoff in Calgary. There were also many people from Red Deer on hand.

The boys would have liked to have stayed in Gleichen just a week longer. When the train started up, it was the original intention to pull up close to the station, but the engineer got his "wires crossed" and kept right on going. The train officials never did hear the end of that.

A special party had to be detailed to retrieve Bdr. Wood, who was given by Gnr. Engstrom at Medicine Hat, and only rendezvous of the Gleichen boys.

It was also noted that Sgt. Murray and Lester were having their pictures taken at Medicine Hat by some of the girls. Wonder where they get the pull? It couldn't be the girls behind the penalty box could it?

The Queensdown gang of Gnr. Laid, McLaughlin, Kingsmith, James, Shultz and S. Brown wish to send their greetings to Queensdown and district.

Arrowwood was ably represented by Bruce Simpson, primary teacher, and now primary in the 22nd and 78th.

Gunnars Barabash and Davenport lodged only one complaint. "Take us Back to old Sarcee." We have heard that they had something there.

At Moose Jaw the trumpeters had to sound the extra calls to locate Bdr. Thorburn who seemed to be taking much time in bidding farewell to Madamolinee of Moose Jaw.

Bdr. Clifford detailed the 22nd and 78th band to strike up at Regina where quite a crowd gathered.

In all in the trip was very interesting. From now on the 22nd and 78th battery will be regimented with the sister battery from Duncan, B. C. and Prince Albert and some serious training will begin.

Sgt. E. R. Lester, M44046, 22nd and 78th R.C.A. C A S F

RED CROSS NOTES

(By Conventress Mrs. S. E. Dafe)

We have been anxious to give authentic information about communications with prisoners of war for

News Items of Local Interest

Mrs. Gorrell and family left last week for Calgary where they will in future reside.

Miss P. Yates left on Monday for Duck Lake where she will teach school for the next year.

Miss May Downey left Tuesday for Calgary where she will enter the Holy Cross hospital and train for a nurse.

Annexes are being built to the elevators at Stobart in order to make storage space for the big crops in that area.

School opened Tuesday as per schedule. With all the children heading to school the town had the appearance of a busy place.

During the past week steady progress has been made with the harvesting operations and excellent results have prevailed. A steady stream of grain has been pouring into the elevators.

Quite a few Gleichen men reported to Sarcee camp Sunday for duty for the next 15 days. Major Hodgson will be missed from his usual place at the armories here, since he will be at Sarcee for the next month.

Chas. Thompson, the local building contractor had the mortuaries to fall some seven feet and so doing hit the corner of a bundle of shingles and broke a piece of bone from his shoulder blade.

The National Day of Prayer will be observed at the United Church on Sunday evening at 7:30 with Rev. R. Upton in charge. Mr. George Burles of Blainmore will be the special soloist.

The Catholic ladies of Gleichen gave a party Sunday night in the P. T. Hall in honor of Mr. and Mrs. P. Downey and their daughters Mary and Esther who are leaving shortly to take up their residence in High River. During the evening presentations were made to the guests of honor. The party was largely attended and the evening was spent in songs, singing, etc.

Some time past, and have been in correspondence with various departments of Red Cross concerning this matter and much valuable information has been gained.

In addition to personal parcels sent by relatives once in three months, Canadian prisoners of war are permitted to receive from British Red Cross Society regular parcels of food sent to Britain where these separate parcels are made up, but now the Canadian Red Cross Society are it is estimated that 5000 parcels a week will go forward to Canadian and British prisoners of war. There is reason to believe that these parcels are received intact, as Red Cross officials are permitted to inspect the prison camps and see to it that our men are not ill-treated.

Some articles of clothing may also be sent from time to time according to the requirements of the prisoner. Letters and post cards may be sent on this side. We have three large boxes of supplies ready to ship next week as well as knitted articles for the soldiers. The Gleichen women have knitted in last neighborhood of 250 pounds of wool into comforts for the soldiers.

Donations of old felt hats will be appreciated. These will be made into bandannas for slippers for refugees. Old felt gloves and leather purses also are used to make linings for women's jackets. Do not throw away any thing which can be made use of in this way.

MORTON'S ASSAILANT ROYBE, SENT TO HIGHER COURT

Appearing before Police Magistrate S. H. Edwards at Bassano on Tuesday morning of this week, Frank Roybe, old time rancher of Gen, answered a charge of "wounding with intent to do bodily harm" resulting from a knifing affray during a fight at the Gem stampede on July 31st last. Jack Morton of Glen, then was injured and severely wounded during the fight, and was a patient in the local hospital for nineteen days following the incident, suffering from cuts about the abdomen, back and neck by a pocket knife. Roybe was arrested following the fight and taken into custody, where he has remained since.

Evidence given by fourteen witnesses of the fight, who appeared at the trial, indicated that Roybe had been the victim of considerable verbal abuse before any actual fighting took place. It is alleged that Morton struck Roybe with an open fist, staggering the man. During the ensuing tussle, evidence indicated that Roybe drew his knife and stabbed Morton several times. The effects of this stabbing on Morton were the cause of the assistance of several bystanders who held Roybe, ended the fight, and medical attention was immediately summoned, and R. M.P. called to the scene.

Following the hearing of evidence, the court told Roybe that it appeared he had been the victim of abuse, but however he had taken to armed means of ending the affair. He was remanded on \$2,000 bail, and will appear before the next court having criminal jurisdiction, this hearing probably to be held in Calgary. —Bassano Recorder.

The Registrar General of French Canada desires it to be known that the defence of Canada Regulations now require all persons who have become British subjects since the 1st of September, 1922, and who at the time of their naturalization were of German or Italian nationality, or of the nationality of any territory which was under German or Italian control at the outbreak of war, to report for registration without delay to the nearest registrar of enemy aliens. Notices to this effect, giving the location of the local registrar will be posted throughout the district within the next few days. Persons coming within the scope of this order must clearly understand that this registration is in addition to, and entirely separate from National Registration.

JAMES WALKER BRINGS DOWN SIXTH GERMAN PLANE

According to radio reports James Walker of Gleichen and son of Mrs. E. Walker, who is with the Royal Air Force in England has been decorated for having shot down his sixth German plane since May. It was at the end of July that the announcement was made that he had shot down four enemy planes. Not much is known here concerning the details of his actions.

James has been with the Royal Air Force for several years and every one here wishes him continued success in leading down enemy planes.

C.P.R. OFFERS TRAVEL BARGAINS TO EASTERN CANADA

An opportunity for an early fall trip to Eastern Canada at the popular bargain fares, has been announced by Mr. H. L. Phillips, local Canadian Pacific ticket agent. Tickets will be on sale daily from September 15 to 27 and about a 45 per cent return limit, with stopover as desired, within limit.

Three classes of tickets will be available. Tourist or Standard, the latter two being good in sleeping cars of class designated, upon payment of usual berth charge. The Canadian Pacific transcontinental trains provide every modern travel convenience—air conditioned coaches, tourist and standard sleeping car dining and observation—with special tray service from dining car for the convenience of coach and tourist sleeping car passengers.

Mr. H. L. Phillips has full particulars and will be glad to give interested parties complete information.

FALL CLASSES

Invite You To Enroll As Early As Possible

Free Placement Service. Our popular Employment Department is free to Employer and employee.

Early Employment. Streamlined courses, individual instruction, independent advancement speed the way to a good position.

Moderate Cost. Concentrated training minimizes expense. Most graduates earn entire tuition costs within three months after securing employment.

College Grade Student Body. High School and College grade graduates are represented in our enrollment.

Prepare To Take Your Place In Business
Garbutt Business College
TRADERS BUILDING

THESE THINGS ARE WORTH WHILE

- 1 The Wheat Pools introduced wheat price stabilization as an innovation in Western Canada. It is now a permanent government policy.
- 2 It cost the Pools \$22 millions to teach Canada that her wheat producers must have price protection. The Pools are paying that money back. Speaking for the Alberta Wheat Pool it can be said the price stabilization of 1929-30 will not cost the province a single cent.
- 3 The government Wheat Board was formed after a lengthy campaign towards that end by the Wheat Pools and farmer organizations. From 1921 up until a couple of years ago the grain trade fought like tigers against the suggestion of a Wheat Board.
- 4 The Wheat Board and other government wheat price stabilization measures have added at least \$200 millions to the income of the west in the past ten years.
- 5 Farmers could get little or nothing for their wheat today but for the Wheat Board.
- 6 Pool elevators have held down profits and have protected grain producers in many ways. The trade now admits there are no large profits in the grain business as in years gone by.
- 7 Prior to the erection of Pool elevators, profits were large. In one year the profits in grain overages alone in terminal elevators at Fort William-Fort Arthur were over \$2 millions. One firm made over 50 per cent in its terminal operations in a single year (Price-Waterhouse Report). These huge profits cannot be made to-day — thanks to the Wheat Pools!
- 8 When grain producers patronize Pool elevators they aid in strengthening a farmer-owned co-operative which is constantly battling for their welfare. Also they build up an equity for themselves in a useful organization. A farmer might defer a million bushels to a line elevator company and he would not have a cent's worth of equity in the concern, nor a word to say in its operation. Remember you get the very best and fairest treatment from Pool elevators.
- 9 Ten years ago the opposition cheerfully predicted Pool elevators were bankrupt and headed for the scrapheap. To-day Pool elevators are in excellent financial shape, rapidly cleaning off all indebtedness and developing plans to devote surplus earnings back to producers. This is the last thing the opposition wants to see done.
- 10 Pool elevators have made a genuine contribution to grain producers, as outlined above, and one that can be measured in millions of dollars.

If at all possible grain producers should see that their grain goes to a Pool elevator. The undisputed version of the opposition shows that Pool elevators are succeeding in their useful and necessary objectives — the consolidating and benefitting of all farmers in Western Canada.

Alberta Pool Elevators

For Greater Practicability

The present day trend towards broadening the basis of the curricula for high schools and of making provision for educational and vocational guidance for the benefit of high school students and their parents in the western provinces is comparatively new, but it appears to be a move in the right direction.

As the Deputy Minister of Education for Saskatchewan recently said at a public meeting the high school curricula at the present time is based on a preparation for entrance into university, but as he also said, with truth only about ten per cent. of students who take a high school course eventually leave the universities. In other words, the courses of study in high schools are tuned to the needs of the ten per cent. who go to university while the other 90 per cent. are largely working with little or no definite objective in view.

It does not necessarily follow, of course, that the 90 per cent. who will not enter university derive no benefit from the training they receive in the secondary schools through which they pass, but it may, and often, no doubt, does mean, that the time they spend in school might be used to better advantage if the subjects made available for study are those which will be of practical value to them when they subsequently embark on the great adventure of making a livelihood for themselves.

Preparing the child for his or her entry in the commercial and industrial life of the country is not, of course, the sole objective of secondary education, but it is an important one, which must not be overlooked, if the educational system is to achieve its full mission. The other important objective of secondary education, or, rather, of the equally important objective that the student's activities in high school be designed to enable him or her to secure the maximum of happiness and enjoyment in post-school life, whether it be at work or at play. In other words, preparation for leisure as well as for work should be one of the aims of secondary education.

Wider Range Needed

When, however, one considers the function of the secondary education which is designed to fit the student for making a living in his or her chosen vocation, it is readily seen that pupils should be given a wider range of subjects from which to choose than are presently available in the average high school, insofar as facilities and financial aid are made available, if students are presumed to be ready to fend for themselves in the outer world after completing grade 12.

Business and commercial activities of today are becoming more complex and more exacting with advancing scientific discoveries and their application to industrial life and it is becoming daily more evident that if school days for 90 per cent. of the students are to end when high school doors close upon them, the range of optional subjects available to them must be widened, if the objective of preparing for making a living is to be realized.

It is not before then, certainly by the time the student steps into grade 11, it should be possible to determine his aptitudes, his likes, his capacities—in short, what type of work he is likely to be best fitted for after leaving school; and that usually means to what he is most interested.

That information having been obtained, analyzed it should then be a comparatively easy matter to determine along what lines the pupil's studies should be pursued to ensure maximum progress while at school and the best results later in the workaday world.

When the great variety of outlets that are offered in the industrial and commercial life of the country are considered, it can be seen that the preparatory scope of the high school must be materially broadened in the future if secondary education is to fulfil one of its major purposes in the scheme of human affairs.

The Key To Education

For some time now forethoughtful teachers have seen the shortcomings of the secondary educational system and have urged changes in curricula and courses of study to bring the system more up to date and more ready to fit it to the needs and capacities, not only of the students but of society generally. Parents also are becoming aware of the necessity for greater elasticity and as this knowledge becomes more crystallized, these needed changes will be put into effect.

No matter what changes are made in the "tools" of the secondary education system, however, the fact that the curricula are not the most important thing should not be forgotten, but only of the students but of society generally. Parents also are becoming aware of the necessity for greater elasticity and as this knowledge becomes more crystallized, these needed changes will be put into effect.

Plan Venturesome Trip

To Take Long Cruise In A 42-Foot Auxiliary Schooner

A North Vancouver music teacher and an Anacortes, Wash., girl who once attempted to paddle a canoe from Anacortes to Ketchikan, Alaska, are planning a cruise in a 42-foot auxiliary schooner from Louisburg, N.S., through the Panama canal to British Columbia waters.

Miss Mavis Wilcox, the music teacher, said Jack Sharpe, a former Yukon mining camp cook, will pilot the craft. Third member of the party will be Betty Annelle Lowman of the Deep Sea Fishermen's Union of Seattle.

In 1937, Miss Lowman was wrecked and rescued in an attempt to paddle a canoe up the Pacific coast to Alaska.

Captain John Antle, retired Anglican clergyman of Victoria and Vancouver, is another adventurer. Seventy-three years of age, Captain Antle is now on his way to Victoria from England.

He left there in his 45-foot yacht, The Reverie, crossed to Funchal, in the Madeira, where he was held up for six weeks because of the submarine menace, then made the trip across the Atlantic to St. Kitt's.

From there he went to Kingston, Jamaica, and last was reported at Cristobal, the entrance to the Panama canal.

Captain Antle expected to reach Victoria about the end of May.

More Airports

No Buildings Allowed To Be Erected In Vicinity Without Permission

The Department of Transport announced that 24 airports in Canada have been designated "for direct or indirect use for military purposes" and therefore are subject to the airport zoning regulations, which forbid construction of buildings or other structures near them without permission.

At or near 10 of the airports so designated, training schools under the British Commonwealth Air Training Scheme will be established. These are at London, Jarvis, Windsor, Kingston, Brantford and Fort William in Ontario; Saskatoon, Prince Albert and Moosebath in Saskatchewan and Windsor Mills, Que.

The other airports designated are Ontario—Hagersville, Brantford, Alliston, Welland, Eldersville and Dunville; Saskatchewan—Vancouver and Oiler; Alberta—Aldred, Currie Barracks, Macleod, Granum, Pearce and Penhold.

Few Are Successful

Neither age nor experience is a specific against the itch to write popular songs, says Doris Attridge, in American Mercury. Over 21,000 are copyrighted yearly in the United States, most of them in music, 9,000 achieve publication, and only a bare 100 emerge as hits. Of the 1,400 who write music for a living in the United States, only 130 write the hits.

Japanese beetles include cultivated geranium leaves and flowers on their diet list, even though the plant is poison to them.

Looking For Proof

Veteran Seeks Comrades Who Know Where He Lost His Teeth

A set of false teeth has started a Canada-wide search for ex-members of the 124th Battalion, transport battalion, who were at Goldfish chateau, railroad near Ypres, in October, 1917.

High Thorney, Great War veteran, a patient in Shaughnessy military hospital, Vancouver, is the man who needs the "storo teeth." He is trying to get them through the veterans' pension board, but there is no proof he lost his teeth under fire at Chateau Goldfish. He must obtain the testimony of men who were there with him the night it happened.

So Thorney placed a classified advertisement in a newspaper. It requested information regarding the whereabouts of George Almond, Bobby Gibbs, "Irish" Jones, or any other member of the 124th Transport.

Almond, Thorney's sergeant, was in a hut when High Thorney staggered in with a bloody face and almost toothless mouth. He and Bobby Gibbs would remember that on the night of Oct. 17, 1917, "Pie" Thorney vomited to dash across a 200-yard no-man's land, under heavy fire, to bring back a sack of coal.

Thorney was the railroad yards—about 200 yards away. It and the surrounding territory had been under heavy German shellfire for several hours. Thorney reached the yard without mishap. He filled his mouth with coal and spat it back. And that's when most of his teeth went galley west. He got up and staggered back to his hut.

The mishap was not officially reported. His injury did not go down on his medical sheet. Now he cannot prove that he has the right to ask for a free set of teeth, and his only hope is the testimony of his former pals.

Britain's Longest-Wed Couple

Recently Held A Celebration On Their 75th Anniversary

Britain's longest-wed couple is claimed to be Mr. and Mrs. James West, of Milnail, near Liphook, Hants.

They have left their diamond wedding ring in the safe since they celebrated their 75th anniversary recently, but did not know what to call it.

James will be 100 in October and his wife 96 in December. He had no school and started work at 10, earning fourpence a day by scaring birds and minding sheep.

After his wedding he began farming, with 1100 lent by a friend. He plowed the same land for 44 years and retired 30 years ago.

The couple have had 14 children, but have lost count of their grand- and great-grandchildren. Eight sons—three of whom are farmers—and one daughter survive.

"I have work and plain livin' is in James West's recipe for long life. 'Have never paid a doctor's bill for myself in all my life,' he says.

The age of some fish can be determined from scales, not by counting the rings, but by counting the marks formed in winter when the scales grow very little or not at all.

ENJOY ITS GENUINE MINT FLAVOR

Every day millions find real enjoyment in the cooling, long-lasting flavor of WRIGLEY'S SPEARMINT GUM.

It's good for you, too—helps keep teeth bright and attractive. Dentists recommend it.

WRIGLEY'S SPEARMINT GUM. GET SOME TODAY!

MARRIAGES IN SCOTLAND

Have Stood To New High Mark Since War Began

Outbreak of war sent Scottish lairds and their lairds marching "through the Rye" to the marrying ministers, according to the preliminary vital statistics issued by the registrar-general for Scotland. The third quarter of 1939, which included September, showed a marriage rate of 12.4 per thousand—a figure higher than post-war norm of 1919-20.

Number of marriages was double that of the first quarter. Altogether there were 46,257 marriages during the year.

Fifty bodies the size of the moon would be required to form one mass as large as the earth.

Nearly 6,000 teachers in Japan have resigned in the last three years.

The Union of South Africa is trying to avert a false war prosperity.

BRINGS INSTANT EASE FROM PAINS, SPRAINS, BRUISES, BURNS, RHEUMATIC ACHES

SHOOTING SEASON WILL OPEN HERE ON SEPTEMBER 14

National Parks Service of the Department of Mines and Resources, Ottawa has just issued the Regulations regarding migratory birds for the current year. A summary of the regulations as they apply to Alberta follows:

In that part of Alberta lying south of the centre of the track of the main line of the Canadian Pacific Railway through Duthill, Calgary, Strathmore, Medicine Hat and Wainwright: From one half hour before sunrise October 1 to one half hour after sunset November 14th.

There is a closed season throughout the year on Deer ducks, Wood ducks, Swans, Cranes, Godwits, Willets, Goodwits, Upland Plover, Greater and Lesser Yellow-legs, Avocets, Dowitchers, Knots, Oystercatchers, Phalaropes, Stilts, Surf-birds, Turnstones and all shore birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds:
Auks, Auklets, Bitterns, Fulmars, Gannets, Grebes, Guillemots, Gulls, Herring Gulls, Loons, Murres, Petrels, Puffins, Shearwaters, and terns; and there is a closed season

throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadowlarks, Nighthawks or Bull-bats, Nuthatches, Orioles, Robins, Shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Waxwings, Whip-poor-wills, Woodpeckers and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest any migratory game birds during the closed season; and no person shall sell, expose for sale, offer for sale, buy, trade or traffic in any migratory game bird at any time.

The taking of the nests or eggs of migratory game, migratory insectivorous and migratory non-game birds (but nests or eggs is prohibited). The killing, hunting, capturing, taking or molesting of migratory insectivorous and migratory non-game birds (but nests or eggs is prohibited).

The possession of migratory game birds killed during the open season is allowed in Alberta until March 31, following the open season.

Bag Limits
Ducks 12 in any day, Geese 5 in one day, Coots and Rails 25 in any day,

Wilson's or Jack-snipe 25 in any day, and 100 calls and coots in the aggregate in one season.

No one shall have in his possession at any time more than 25 ducks.

Game Appliances, Hunting Methods

The use of automatic (auto-loaded) guns or swivel or machine guns, or battery or rifle or shot gun loaded with a single bullet, or any gun larger than number 10 gauge is prohibited, and the boat, live birds as decoys, night lights, use of any aeroplane, power boat, sail and shooting from any vehicle drawn by a draught animal or from a motor vehicle is forbidden. The hunting of migratory game birds on areas baited with grain or other artificial food is prohibited.

The shooting of migratory game birds earlier than one half hour before than sunrise or later than one half hour after sunset is prohibited.

The penalty for violation of the regulations is a fine not exceeding six months or both fine and imprisonment.

ST. ANDREW'S CHURCH
Service Sunday Sept. 8th.
Evening service at 7:30 p.m.
Rev. L. T. Pearson, incumbent.

MANY SURRENDER PENSIONS TO AID CANADA IN WAR

While air supremacy drives and drives for the purchase of war savings stamps and certificates gather momentum, donations from individuals and associations far and near come to the aid of a merry host in the daily contribution state coffers. A trend that is assuming nationwide proportions is noted. In the great number of pensioners, voluntarily surrendering their pensions, in whole or in part, for the duration of the war to help Canada carry on.

During past weeks, scores of persons have written in asking to have any pension they are entitled to have deducted from their monthly cheques.

Twenty-five thousand dollars in United States funds from an anonymous sympathizer were earmarked for the purchase of airplanes. Another \$15,000 was received for the same purpose. Donations, small and large from individuals during the month of September have amounted to approximately \$60,000. During the same period, donations from (1) couples, such as municipalities, cities, towns, associations and industrial firms amounted to about seventy-five thousand dollars.

Not in the mail of the four eight-year old totos in Toronto who raised \$4.20 by selling home made lemonade, overshadowed by the large total. It serves only to make their humble little gift the more admirable.

THE WORLD OF WHEAT

Samples representing some 20,000 farmers' fields of wheat and several over 40 Crop Testing Plant district plots in Alberta, Saskatchewan and Manitoba have now been analyzed by competent chemists.

As usual a number of farmers have been discovered in each district whose crops were sufficiently true to variety to classify as Crop Testing Plant "A". This means that these farmers should have grain to sell to their neighbors that is quite good enough to be used as seed by anyone in the district. Farmers, therefore, on the lookout for good seed, this coming year, and at a small premium only over elevator price, would be well advised to find out the names of their neighbors who have "Crop Testing Plant "A" stocks to spare.

Last year large quantities of good seed were distributed from farmers who had A stocks to those whose crops were classified by the Crop Testing Plant as C or Mixtures, and during the past ten years approximately four million bushels of this good A material have been purchased and sown by farmers; all of which undoubtedly has helped to improve the quality of the wheat grown on our prairies.

Canada's 2nd War Loan Swings into Action

Canada calls again! While the enemy hammers at the heart of the Empire, Canada launches her Second War Loan Campaign. The money is needed NOW for planes, troops, tanks, ships, munitions and guns. It is needed to help Canada win the war—to preserve your freedom. Everything you hold dear is at stake, your home, the future security of your family and your country. Now is the time for you to act!

Here is your chance to defend the Canada you love—with the dollars you lend. At the same time you will receive a good return, in the form of interest, on every dollar you invest in Canada's freedom. Be prepared to buy—and buy generously—Canada's Second War Loan, to be announced on Friday, and on sale beginning Monday. Buy from any investment dealer, bank or stock broker.
